

HealthierChurch.org Focus Groups

The purpose of our current HealthierChurch.org focus group is to develop an understanding of what pastors and lay leaders think are the keys to a successful thriving church, the “draw” that they have or create and how they think about getting assistance to improve their church organization. This foundation helps give us a clear direction and definition of what services to provide and how to be engaged for those services.

Listed here are some suggested questions that would be included in a focus group:

- 1) What elements are present and key to a successful and thriving church?**
- 2) What barriers get in the way of having a successful and thriving church?**
- 3) What are the benefits of having outside coaching and insight?**

If you are interested, please email ed.kruse39@gmail.com and tell him you would like to be part of an upcoming focus group.
